Forex Report Analysis Tool

This report analysis tool will analyze **.html** reports produced by MetaTrader 4/5 (including Strategy Tester) and Oanda platform. The result of this analysis will be available in form of various metrics for your further consideration. First, you should create a report in your trading platform, then you need to submit it via the form below. This tool does not analyze Optimization Reports generated by MetaTrader Strategy Tester. You can [discuss report analysis tool](#) at our forum.

Currently working with the report file: **ReportTester-RTS-GARCH_.html**. You can specify another report file if you want:

File is not selected

Select file

- ☐ Force close open positions
Strategy Tester closes all positions automatically at the end of period.
- ☐ Count swap and commission for loss/profit
- ☐ Calculate Risk of Loss with exact probability formula (can be quite slow)

Submit

Summary

Platform	Period	Last Trade	Starting Balance	Highest Balance	Lowest Balance	End Balance

Forex trading bears intrinsic risks of loss. You must understand that Forex trading, while potentially profitable, can make you lose your money. Never trade with the money that you cannot afford to lose! Trading with leverage can wipe your account even faster.

CFDs are leveraged products and as such losses may be more than the initial invested capital. Trading in CFDs carry a high level of risk thus may not be appropriate for all investors.
